

Wireless fire alarms at a scale not known before

Virtually no disruption

Minimal impact to fabric or occupants

20x faster installation

Efficient Labour allocation

Adaptable and scalable

511 devices per system
2500+ networked

No translators or expanders – no first-fix

Zero wires beyond the panel

With MeshBeyond™ technology, our systems self-form and self-heal, ensuring stability that rivals wired systems.

A panel to love

A proprietary panel that's a joy to use for installers and building managers.

Complex cause and effect functionality made simple.

Cygnus devices

Our devices are fully wireless, requiring no hard-wiring beyond the panel.

Thousands of devices can be meshed in a system.
